

# killFlash® 40LTC-ARD

for Leupold Mk IV & Long Range Tactical zoom rifle scopes

Tenebraex Corporation [www.camouflage.com](http://www.camouflage.com)

## SPECIFICATIONS

### Mechanical

Dimensions o.d. 1.8" (46mm)  
length 1.5" (38mm)

Weight Each .7 oz. (20g)

Housing Material Matte black glass-filled thermoplastic

Filter Material Resin-reinforced composite honeycomb with special matte black coating

Temp. Range +160 to -60 F  
+ 71 to -51 C

### Optical

% Light Loss Approximately 15%

### Maintenance

Rinse with water to clear cells, blow dry

The killFlash® Model #40LTC-ARD is designed to eliminate potentially compromising reflections from a rifle scope's objective lens. This rugged unit is threaded to fit both the Leupold Mk IV M-1 and M-3 and the Leupold Long Range Tactical rifle scopes. killFlash® ARDs give protection without loss in resolution or change in point of aim.

Less than 1 1/2" long (38mm), the geometry of its 1" thick (25.4mm) honeycomb of tubes gives the Model #40LTC-ARD the same glint shielding ability as a conventional tube over 16" (406 mm) long. The patented geometry of the ARD's honeycomb shield maintains a clear, bright view through the sight and does not interfere with target acquisition. It also cuts glare, improving vision when looking up-sun.

If they don't see you... they don't shoot you.®
