

killFlash® 60LSC-ARD

for Leupold 12 - 40 x 60mm spotting scopes

Tenebraex Corporation www.camouflage.com

SPECIFICATIONS

Mechanical

Dimensions o.d. 2.60" (66mm)
length 1.41" (36mm)

Weight Each 1.2 oz. (34g)

Housing Material Matte black glass-filled thermoplastic

Filter Material Resin-reinforced composite honeycomb with special matte black coating

Temp. Range +160 to -60 F
+ 71 to -51 C

Optical

% Light Loss Approximately 15%

Maintenance

Rinse with water to clear cells, blow dry

The killFlash® Model #60LSC-ARD is designed to eliminate potentially compromising reflections from a spotting scope's objective lens. This rugged unit is threaded to fit Leupold 12-40 x 60mm Spotting scopes. killFlash® ARDs give protection without loss in resolution.

Less than 1 1/2" long (36mm), the geometry of its 1" thick (25.4mm) honeycomb of tubes gives the Model #60LSC-ARD the same glint shielding ability as a conventional tube over 20" (508 mm) long. The patented geometry of the ARD's honeycomb shield maintains a clear, bright view through the sight and does not interfere with target acquisition. It also cuts glare, improving vision when looking up-sun.

If they don't see you... they don't shoot you.®
