

killFlash® M22G-ARD

for Leupold 12 - 40 x 60mm spotting scopes

Tenebraex Corporation www.camouflage.com

SPECIFICATIONS

Mechanical

Dimensions o.d 3.5" (90mm)
length 2.46" (62mm)

Weight Each 4 oz. (113 g)

Housing Material OD green santoprene over
acetal core

Filter Material Resin-reinforced composite
honeycomb with special
matte black coating

Temp. Range +160 to -60 F
+ 71 to -51 C

Optical

% Light Loss Approximately 15%

Maintenance

Rinse with water to clear cells, blow dry

One of our killFlash® Model #M22G-ARDs—originally designed to fit the M22 Steiner binocular—makes a good fit to the Leupold 12 - 40 x 60mm spotting scope. It is complete with an integral dust cover. This ARD can eliminate potentially compromising reflections from the spotting scope's objective lens. killFlash® ARDs give protection without loss in resolution.

Less than 2.46" (62mm) long, the geometry of its 1" thick (25.4mm) honeycomb of tubes gives the Model #M22G-ARD the same glint shielding ability as a conventional tube over 20" (508 mm) long. The patented geometry of the ARD's honeycomb shield maintains a clear, bright view through the sight and does not interfere with target acquisition. It also cuts glare, improving vision when looking up-sun.

If they don't see you... they don't shoot you.®
