Tenebraex Corporation www.camouflage.com

SPECIFICATIONS

Mechanical

Dimensions	o.d. 1.1" (28mm) length .74" (19mm)
Weight Each	.1 oz. (3g)
Housing Material	Matte black thermoplastic
Filter Material	fine-cell aluminum honeycomb with special matte black coating
Temp. Range	+160 to -60 F + 71 to -51 C

Optical

% Light Loss Approximately 15%

Maintenance

Rinse with water to clear cells, blow dry

The KillFlash® Model TRM-ARD is designed to eliminate potentially compromising reflections from the objective lens of the Trijicon Reflex (red dot type) close combat sight. This rugged, low profile KillFlash® ARD enhances the Reflex's use under a wide range of infantry engagement scenarios, including patrolling, MOUT, close quarters battle (CQB), and fire and maneuver operations. The patented geometry of the ARD's honeycomb shield maintains a clear, bright view through the sight and does not interfere with target acquisition. The lightweight, low maintenance design of the ARD adds virtually no additional weight to the soldier's load. Simple screw-in installation.

If they don't see you... they don't shoot you.®
